Reasons for allowance

1. The following is an examiner's statement of reasons for allowance:

The present invention directed to an image-effect apparatus that comprises an output unit for outputting the first image and intermediate image. Independent claims 4 and 7 identify the uniquely distinct feature "wherein the corresponding point file describes lattice points of a mesh taken on the first image, wherein the lattice points represent less than all of the pixels in the first image, and a positional relation points in the second image which correspond to the lattice points." The closest prior arts Richards (US Pat. No. 5,343,241) and Shinagawa (US Pat. No. 6,137,910) either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
